Tulsa Metropolitan Area Planning Commission

Z-7851 Staff Report (Related to CPA-128)

Hearing Date: March 18, 2026 (Continued from 3/18/2026)
Prepared by: Nathan Foster
nathanfoster@cityoftulsa.org
918-596-7609

Owner and Applicant Information

Applicant: Lou Reynolds, Eller & Detrich, P.C.

Property Owner: Robert H, Eriksten Jr., Kenneth E. Brashear and Linda S. Brashear, Angela and Erik Wiebener, and John E. Keel.

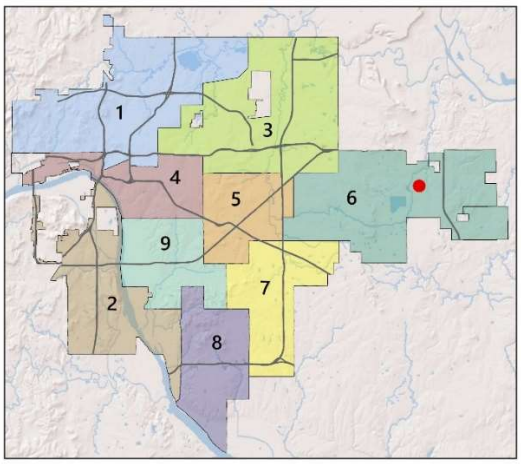
Property Location

Multiple properties between East 11th Street South and East 21st Street South, east of South 193rd East Avenue

Tract Size: ±375 acres

Location within the City of Tulsa

(shown with City Council districts)



Elected Representatives

City Council: District 6, Christian Bengel
County Commission: James Hanning (Wagoner D1)

Public Notice Required

Newspaper Notice – min. 20 days in advance
Mailed Notice to 300' radius – min. 20 days in advance
Posted Sign – min. 20 days in advance

Staff Recommendation

Staff recommends denial.

Request Summary

Rezone subject properties from AG to IL to permit the expansion of the Project Anthem data center campus.

Zoning

Existing Zoning: Agricultural (AG)

Existing Overlays: None

Proposed Zoning: Industrial Light (IL)

Use

Current Use: Agricultural

Proposed Use: Data Center and related uses

Comprehensive Plan Considerations

Land Use

Land Use Plan: Neighborhood

Small Area Plans: None

Development Era: Future Growth

Transportation

Major Street & Highway Plan:

East 11th Street South – Secondary Arterial

East 21st Street South – Secondary Arterial

planitulsa Street Type: N/A

Transit: N/A

Existing Bike/Ped Facilities: N/A

Planned Bike/Ped Facilities: Signed Route along E 21st St S

Environment

Flood Area: FEMA 100-year Floodplain and Tulsa Regulatory Floodplain

Tree Canopy Coverage: 30-50%

Parks & Open Space: N/A

Detailed Staff Recommendation

The applicant is proposing to rezone 375 acres from AG to IL to permit light industrial uses, specifically a data center. The area is largely undeveloped, consisting of mostly agricultural uses and vacant land. There is existing IL zoning to the east of the subject property adjacent to the Creek Turnpike while all other adjacent properties are currently zoned AG. On February 4, 2026, TMAPC recommended approval of MPD-6 which would rezone adjacent property to the northeast of the subject property and permit industrial uses.

Unlike the properties included in previous rezonings to permit industrial uses, the subject properties included in this application are designated as neighborhood on the Tulsa Comprehensive Plan Land Use Map, rather than employment. The Comprehensive Plan identifies the areas located adjacent to the highway and East 11th Street as future areas for development consistent with the employment land use designation but reserves the areas farther west and interior to the section as neighborhood to establish a diversity of opportunities for future growth.

The applicant has requested an amendment to the comprehensive plan to designate the area under application as employment under case number CPA-128. Staff is recommending denial of the proposed land use amendment based on recommendations found in the Tulsa Comprehensive Plan and insufficient justifications for the proposal.

Employment designations are widespread in the immediate area, with several of those areas recently receiving favorable recommendations from TMAPC for additional industrial zoning. The existing employment areas, established in 2023 as part of the Tulsa Comprehensive Plan update, are largely undeveloped and provide sufficient opportunities for new industrial uses without necessitating a reduction in areas planned for future neighborhood development. The existing areas designated as employment align with recommendations of the comprehensive plan by remaining oriented to major highway and arterial corridors. Some, but not all, of those areas are separated from the planned neighborhood areas by floodplain designations which can provide natural buffers between employment scale uses and residential areas.

IL zoning would not be consistent with the neighborhood land use designation which is intended to accommodate primarily residential uses.

With consideration given to the factors listed herein, staff recommends **denial** of the application.

Comprehensive Plan Considerations

Land Use Plan

The subject properties are designated as Neighborhood. **Neighborhoods** are mostly residential uses, which includes detached, missing middle, and multi-dwelling unit housing types. Churches, schools, and other low intensity uses that support residents' daily needs are often acceptable, particularly for properties abutting Multiple Use, Local Center, or Regional Center land use areas. Multi-dwelling unit housing that takes access off an arterial is considered Multiple Use, Local Center, or Regional Center. If a multi-dwelling unit housing property takes access from a lower-order street separated from the arterial, then it would be considered Neighborhood.

Surrounding Properties:

Location	*Existing Zoning/Overlay*	*Existing Land Use Designation*	*Existing Use*
North	AG	Regional Center, Local Center, Employment	Agricultural & Vacant
East	IL & AG	Employment	Data Center (Under Construction)
South	AG	Neighborhood	Agricultural
West	AG/RT66	Neighborhood & Local Center	Agricultural & Commercial

Small Area Plans
The subject properties are not located within any adopted small area plans.

Development Era
The area under application is designated as a "future growth" area. These areas of the city have yet to be developed beyond agricultural uses, and they present opportunities to ensure the pattern of development is efficient and fiscally responsible. These areas typically do not have subdivision streets or connectivity beyond the mile-by-mile grid, have poor public service distribution (fire, police, transit, etc.) and lack utility infrastructure (water, sewer, broadband, etc.) Some areas also include exposed bedrock and/or extreme slopes. Priorities in these areas include ensuring the ability to provide adequate public services, the implementation of planned streets in the Major Street and Highway Plan, land use planning to establish frameworks for decision making, and conservation of natural areas.

Transportation
Major Street & Highway Plan: East 11th Street South and East 21st Street South are both designated as secondary arterials requiring an ultimate right-of-way width of 100 feet.

Comprehensive Plan Street Designation: N/A

Transit: N/A

Existing Bike/Ped Facilities: N/A

Planned Bike/Ped Facilities: A Signed Route is planned along E 21st Street South. Sidewalks are planned along all public streets in the City of Tulsa.

Environmental Considerations
Flood Area: The subject properties include areas of both FEMA and City of Tulsa Regulatory Floodplains.

Tree Canopy Coverage: Tree canopy in the area is 55%. Development will naturally have an impact on tree canopy, but all effort should be taken to preserve a substantial portion of the tree canopy in these areas. These areas should have the highest level of preservation to maintain the existing habitat and recreational places in the city. Future land use planning for Future Growth areas should include the goal of tree canopy preservation.

Parks & Open Space: N/A

Zoning History
Ordinance 20244, dated November 20, 2001, established zoning for the subject property.

BRASHEAR PROPERTY

The West Half (W/2) of the Southwest Quarter (SW/4) of the Northeast Quarter (NE/4) of Section Seven (7), Township Nineteen (19) North, Range Fifteen (15) East of the Indian Base and Meridian, Wagoner County, State of Oklahoma.

AND

The Southwest Quarter (SW/4) of the Southeast Quarter (SE/4) in Section Seven (7), Township Nineteen (19) North, Range Fifteen (15) East, Wagoner County, Oklahoma.

AND

The South Two (2) Acres of the Northeast Quarter of the Northwest Quarter (NE/4 NW/4) and the East Thirty-eight (38) acres of the Southeast Quarter of the Northwest Quarter (SE/4 NW/4) of Section Seven (7), Township Nineteen (19) North, Range Fifteen (15) East of the Indian Base and Meridian, Wagoner County, State of Oklahoma

LESS AND EXCEPT A tract of land situated Government Lot One (1) of Section Seven (7), Township Nineteen (19) North, Range Fifteen (15) East of the Indian Base and Meridian, Wagoner County, State of Oklahoma and being more particularly described as follows:

Beginning at a 6" wood fence corner post found at the intersection of the West line of said Brashear Tract and the South Right-of-Way line of East 11th Street (variable width right-of-way), from which a 5/8-inch iron rod found at the Northwest corner of said Section 7 bears North 81°54'05" West, a distance of 362.08 feet, and from which a 1-inch iron pipe found bears North 01°38'58" West, a distance of 4.21 feet; thence North 88°33'37" East, on and along said South Right-of-Way line, a distance of 560.00 feet to a 5/8-inch iron rod with Aluminum cap stamped "COA 4216" set for corner, from which a 3/8-inch iron rod found at the North ¼ Corner of said Section 7 bears North 86°25'24" East, a distance of 1608.94 feet; thence South 01°38'36" East, leaving said South Right-of-Way line, a distance of 388.93 feet to a 5/8-inch iron rod with Aluminum cap stamped "COA 4216" set for corner; thence South 88°33'37" West a distance of 560.00 feet, back to the West line of said Brashear Tract to a 5/8-inch iron rod with Aluminum cap stamped "COA 4216" set for corner, from which a 3/8-inch iron rod found at the West ¼ corner of said Section 7 bears South 08°00'41" West, a distance of 2220.35 feet; thence North 01°38'36" West, on and along said West line, passing a 5/8-inch iron rod with Aluminum cap stamped "COA 4216" set for witness monument at a distance of 388.43 feet, and continuing for a total distance of 388.93 feet back to the Point of Beginning.

AND

The East 24.12 acres of the North 34.39 acres of Government Lot 1 and the North 38 acres of the Northeast Quarter of the Northwest Quarter of Section Seven (7), Township Nineteen (19) North, Range Nineteen (19) East of the Indian Base and Meridian, Wagoner County, State of Oklahoma

LESS AND EXCEPT A part of the Northeast Quarter of the Northwest Quarter (NE/4 NW/4) of Section Seven (7), Township Nineteen (19) North, Range Fifteen (15) East of the Indian Base and Meridian, Wagoner County, State of Oklahoma, according to the U.S. Government Survey thereof, being more particularly described as follows, to wit:

Commencing at the Northwest corner of said Section 7; thence N 88°32'14" E along the North line of said Section 7 for a distance of 2024.20 feet; thence S 01°27'46" E a distanced of 60.00 feet to the Point of Beginning: Thence S 01°31'55" E a distance of 390.02 feet; thence S 17°19'01" E a distance of 436.56 feet; thence S 72°40'59" W a distance of 473.56 feet; thence N 17°19'01" W a distance of 440.72 feet; thence N 72°40'59" E a distance of 443.56 feet; thence N 01°31'55" W a distance of 394.22 feet; thence N 88°32'14" E a distance of 30.00 feet to the Point of Beginning.

WEIBENER PROPERTY

A part of the Northeast Quarter (NE/4) of the Northwest Quarter (NW/4) of Section Seven (7), Township Nineteen (19) North, Range Fifteen (15) East of the Indian Base and Meridian, Wagoner County, State of Oklahoma, according to the U.S. Government Survey thereof, being more particularly described as follows, to-wit:

Commencing at the Northwest corner of said Section 7; Thence N 88°32'14" E along the North line of said Section 7 for a distance of 2024.20 feet; Thence S 01°27'46" E a distance of 60.00 feet to the Point of Beginning; Thence S 01°31'55" E a distance of 390.02 feet; Thence S 17°19'01" E a distance of 436.56 feet; Thence S 72°40'59" W a distance of 473.56 feet; Thence N 17°19'01" W a distance of 440.72 feet; Thence N 72°40'59" E a distance of 443.56 feet; Thence N 01°31'55" W a distance of 394.22 feet; Thence N 88°32'14" E a distance of 30.00 feet to the Point of Beginning

ERICKSTEN PROPERTY

The East Half (E2) of the Southwest Quarter (SW4) of Section Seven (7), Township Nineteen (19) North, Range Fifteen (15) East, Wagoner County, Oklahoma;

LESS AND EXCEPT a tract of land lying in the East Half (E2) of the Southwest Quarter (SW4) of Section Seven (7), Township Nineteen (19) North, Range Fifteen (15) East of the Indian Base and Meridian in Wagoner County, Oklahoma, more particularly described as follows, to wit:

Beginning at the Southwest corner of said East Half (E2); Thence North 0°09'17" West along the West line of said East Half (E2) a distance of 880.00 feet to a point; Thence North 89°59'28" East a distance of 148.50 feet to a point; Thence South 0°09'17" East a distance of 880.00 feet to a point on the South line of said East Half (E2); Thence South 89°59'28" West along said South line a distance of 148.50 feet to the point of beginning.

KEEL PROPERTY

The North Half of the Southeast Quarter (N/2 SE/4) in Section Seven (7), Township Nineteen (19) North, Range Fifteen (15) East of the Indian Base and Meridian, Wagoner County, State of Oklahoma, according to the United States Government Survey thereof.

AND

The Southeast Quarter of the Southeast Quarter (SE/4 SE/4), LESS 1 acre square out of the extreme Southeast corner of the SE/4, deeded to Wagoner County for a school, in Section Seven (7), Township Nineteen (19) North, Range Fifteen (15) East of the Indian Base and Meridian, Wagoner County, State of Oklahoma, according to the United States Government Survey thereof.

AND

The East Half of the Southwest Quarter of the Northeast Quarter (E/2 SW/4 NE/4) of Section 7, Township 19 North, Range 15 East of the Indian Base and Meridian, Wagoner County, Oklahoma, according to the U.S. Government Survey thereof.

Subject: [External Mail] Case Z-7851

To Whom It May Concern:

I will attend the March 18th hearing. I want to speak. I own 78 acres adjacent to the west as manager of Ann Landrith Holdings, LLC.

Please let me know if I need to send final official comments in advance. Here are preliminary comments:

- We want to continue to enjoy the land as-is. (fishing, hiking, off-roading, and enjoying nature. We see eagles, ducks, hawks, deer, beavers, fox, coyote, and many more wildlife)
- We want to abide by TMAPC long term city plan. And our most recent professional valuation aligns with city plan for residential.
- We're concerned approving this case will devalue our property.

Thank you,

Adam J. Leavitt, Manager

To: Tulsa Planning Office
Subject: [External Mail] Data Center Input

To the Tulsa Metropolitan Area Planning Commission,

Please support the proposed 365 day moratorium ordinance on new building permits for data centers. Also, please add the already proposed data centers being put on hold. That all of this can be put on hold, so that there can be time for gathering information that will help make decisions that are best for the people and environment. Care needs to be taken for our beautiful Tulsa and Green Country area, and it's people and environment. We only have so much living space on this planet, and there is so much negative effecting our living space. Data centers will add to our threat of living in beauty and with health.

Also, here is my hopeful wishlist for a city moratorium on:
*New data centers
*Already proposed data centers
*Expansions of existing data centers
*Rezoning for data centers

*Please remove hyperscale data centers from the light industrial zoning code, and oppose the 300+ acre expansion of the Project Anthem data center.

Thank you for your time.
Debbie Wayman

To: Tulsa Planning Office
Subject: [External Mail] Data center boom

As a small business owner and a homeowner, I am extraordinarily concerned and angry about the presence of Data centers in our city and anywhere near our city and in our state.

I realize that nobody cares about anything unless it makes them money and that a lot of people are complicit in the building of the centers because they are getting some sort of remuneration.

As heartless and unaffected, these people will be by the risks of these data centers. This is my plea, because I know that money talks, and our voices don't matter at all at the very least you all can endeavor to protect the citizens of this poor sad city.

Before, whoever receives their remuneration from these corporations for selling out our city- walks away - fat cats with rich wallets at the very least, you should endeavor to protect the residents of this area and the animals in this area.

Key things to address SB480 which requires them to use natural gas. Can add an amendment to require some of this to be cleaner energy such as wind, solar.

Create a regulatory board which will have oversight over the energy used and pollution created.

Create a board to: study their impacts, to determine how data centers impact both water and electric usage. How this impacts the environment.

Electric grid modernization surcharge: ensure that the data centers are required to pay for updates toward the electric grid.

STEM investment: tax created to fund education in the state to help create jobs that AI will be eliminating.

Ensure that no tax payer dollars or civilians are obligated to carry the expense of the data center through the electric grid or through tax incentives.

Ensure that jobs at the data center are both local and union.

Water is prioritized for the people of the state, and not data centers. Create a bill which would protect Oklahoma's in the event of a drought from losing water access.

No tax exemption for the AI centers, as they are the current boom. Tax payers in the state will not subsidize these billionaire owned for profit corporations.

Place a cap on water usage and create a regulatory body to ensure the water they put back into the system is not only safe but free from harmful chemicals such as PFAS. If they damage the water table with sediment they are responsible for cleaning this up and returning the water table to its state prior to their use.

Create a fund for healthcare and environmental repair for the expense which will come from their existence as they will inevitably cause. They likely already have things in place to protect them from being sued by civilians so we need to create a tax that will enforce this in advance. Think about the earthquakes caused by fracking that Mary Fallon prevented civilians from suing gas companies for damages caused by the earthquakes.

Where will the toxins they create go - and how they will be disposed of. These need to meet and exceed Oklahoma requirements because they will be using over an estimated 669,900,000 gallons of water annually. We need to know where the toxins that go into this sludge are going to be handled and how.

To: (DIST9) Bush, Carol
Cc: Tulsa Planning Office
Subject: [External Mail] Moratorium on Data Centers and no to exempting/expanding Project Anthem.

Dear Councilor Bush, Tulsa City Council, and Tulsa Planning Commision,

I am writing to you as a concerned citizen of district 9 in Tulsa. I live a few blocks away from the river. I walk on the river almost every day. I look at the refinery every day, and smell the refinery every day. This reality has made me very aware of how the industries we depend on can also be industries that harm us, and the very things we love. For far too long we have just reaped the benefits of these industries. Now we must face the reality of the consequences of these industries to our air, water, and soil. It is time to take on the responsibility of protecting our air, water, soil above all else for our children's sake.

I ask you to support the moratorium on data centers in Tulsa. There should be no exception made for Project Anthem and there should be no permission given by the planning commission to change zoning to industrial to allow an expansion of Project Anthem in the future. The city council must have time to gather all information about the consequences of this new tech industry before we give away our precious air, water, and soil. We already have so many polluting industries, like our 2 HF Sinclair refineries, that do as they wish with no effective regulations besides a few fines that are easy for them to pay off every year. They continue to dump pollution into our river, soil, and air with no-one collecting data on them except themselves! How will these legacy oil polluted sites be cleaned up to be safe for our future generations? Who will pay for this clean up? We have so many other pressing issues like this that we must not add to the pile with abondoned data center sites 25 years from now.

Think into the future. Think of your grandchildren. The decisions we make today will affect them. We must protect our air, water, and soil for the future generations.

Do the right thing and vote yes for a one year moratorium on data centers including Project Anthem.

Sincerely,

Neera Singh

Tulsa does not need another data center. There isn't any data that needs to be collected. It uses massive amounts of water. Water we dont have enough of to begin with. Also has anyone seen what's its been doing to the water in Stillwater. Its killing the wildlife and turning everything an ugly brown. These centers are toxic wastes if space. I dont want my city dirtier than it already is for no reason. These data centers dont need to exist.

I am a land owner on both sides of 21st in AND AROUND the proposed area. This area has been forgotten for many years. I am excited for the proposed Data Center and much work has already been done. I read with much interest that the staff recommendation is denial. There is argument to be made that land surrounding property on all sides is for employment with flood zone cutting right through the middle not consistent with neighborhood development. The Data Center is already currently under development. Recommending denial is to halt progress that has already begun which hinders economic development in the area. The land is exposed to Spunky Creek on the west and large power lines to the east. It will never support any neighborhood. Has a traffic study been done? Could a two-lane road support entire neighborhoods in the area? It would take a massive multi-million-dollar bridge to even get across that area of the creek. All of the frontage has not been included in the rezoning request which can still allow for residential use. I own a parcel to the south and to the north along 193rd and very open to non-industrial future use. Has anyone even taken the time to visit Pryor and the Amazon Data Center? There is an apartment complex across the street and I have been there. You can't hear anything from that building that would make you say "not living hear".

Subject: [External Mail] Data Centers - March 18th

Good afternoon,

I'm writing to voice my concern over the building of data centers within our city. I have always respected and been proud of how conscientious Tulsa is of the environment and making sure there are beautiful outdoor spaces dedicated for enjoyment.

Data centers not only threaten the environment with emissions and the amount of water required for cooling, but they would also take away valuable land space for housing. New housing development availability is critical for growth and rezoning for data centers is not in the best interest of our community.

Please consider saying no to any new data centers in our city. Our community does not want them!

Thank you for your consideration,

A concerned Tulsa resident

Subject: [External Mail] TMPAC March 18 vote

Hello,

My name is Alyssa, and I have been a Tulsa resident for most of my life. I heard TMPAC will be considering a vote on March 18 whether to rezone land in Tulsa for another data center.

As a Tulsa resident, I urge you to not allow this to happen. Tulsans do not want data centers here. They negatively affect the surrounding communities by using up local water, surging energy costs, and causing pollution.

Please research the negative effects of data centers on local communities and do not allow a new data center to prey on Tulsa.

'This isn't right': impact of AI data centers on residents and their utility bills

Thank you.

To whom it may concern,

I'm Cora Lacy, I've been a resident of Tulsa, Oklahoma for nearly ten years, and after many hours of research, conversations, and debates, I can confidently say I do NOT want an AI data center. All my resources to come to this conclusion will be linked towards the end of this email. In this email, I will put in detail my arguments against this data center in terms of what it could do to our water supply, our power grid, the air, our very quality of life, and point out why it won't solve our current unemployment crisis.

These data centers have a very traceable history of contaminating the water supply, driving up the electricity usage which leads to unstable power, or just power outages all together. These things are already something the citizens of Tulsa struggle with. Not to mention the amount of water these data centers use, making nearby neighborhoods suffer the consequences.

The land this Ohio company wants to build on our land could be used to build houses--something Tulsa citizens deeply need more of--or building something that would bring more permanent job opportunities rather than temporary (more on this later).

Data centers built closer and closer to residential areas have been shown to pollute even the very air around them. Take for example the AI data center built in Memphis, TN. The people who are still living in the area have noted the air smells rancid, people who had absolutely no health conditions are now prone to asthma attacks, have to buy jugs to water to shower, wash dishes, do their laundry, cook, and drink because of how contaminated their water supply has become, and how fast it's being drained. Much like many Tulsans, they cannot afford to leave their homes in search of somewhere better, especially when it seems these data centers are popping up everywhere, and making everyone's overall quality of life worse. Even those who agreed to build them in the first place.

One of the pro arguments for these data centers is how many jobs they bring to the area. However, these jobs are not vast or permanent. Yes, construction crews will have certified jobs to build and set up these centers, however, once they're built, there are only a dozen or so jobs for people to have permanently. This will not solve our unemployment crisis, not by a mile.

Building this data center will NOT improve the lives of everyday citizens/voters. Instead, it'll put an even bigger strain on our power grid, especially during peak summers and winters, when citizens will need their power the most. It'll give us less space for housing, less opportunities for better businesses to build and give a greater amount of citizens jobs, it'll lessen the quality of life in Tulsa making it undesirable for those who would want to move here and for those who are already living here, it'll contaminate our water, it'll pollute our air, and it'll strain our fragile power grid even more.

I hope this email finds you well, and I hope you read it with care and an open mind. Do not let this center be built by a company who won't even say who they are to the public, and who are not based in Oklahoma.

Thank you for your time.

Subject: [External Mail] Data Centers in our state

It has come to my attention that the city of Tulsa is visiting the idea of bringing in data centers. While not a resident of Tulsa, I am a resident in Oklahoma and what happens in Tulsa will cause a domino effect. our precious resources and beautiful land shouldn't go to waste because of data centers. They are unethical and stand against Oklahoma's values of hard honest work. I do realize you have already moved into data centers, they should be closed and the workers relocated. This is not the way to create new jobs.
To help support my claims, here are some articles I'd like you to look at.

https://www.lincolninst.edu/publications/land-lines-magazine/articles/land-water-impacts-data-centers/

https://www.wri.org/insights/us-data-center-growth-impacts

https://www.youtube.com/watch?v=9K9bDvYHa18

don't do this to us.

Subject: [External Mail] Tulsa Data Center

Hello, I am writing this email in regards of the plan on a new data center. I don't agree it's it as a fellow Tulsan. I have been living here for more than 20 years now, I would appreciate if Tulsa starts doing better for their residents. I don't think it's a great idea just because there are other issues that need to be addressed. I honestly live Tulsa, but if things like this continue I am going to stop considering leaving and actually take action in leaving. Tulsa needs housing and building a new data center just wouldn't be a smart move because we need more housing. Thank you for your time and I really hope that Tulsa reconsiders this. I'm praying for Tulsa. May the mayor and companies do the best for fellow Tulsans.

Subject: [External Mail] Data Centers

Good morning. Why not wait and see how the Clydesdale project works out? Let's see just how much this will benefit our city or do harm? The company that won't reveal their name saying if they can't have 2 data centers they may walk away, fine let them. They want/need us a whole lot more than we need them!!
There are 38 data centers in Oklahoma already, so we need not rush just because "they may walk away". How many times have they achieved their goals using that threat?
Please deny this unnamed company a data center (or 2) here!!

Thank you,

Winnie Brown

To: Tulsa Planning Office
Subject: [External Mail] opposed to Project Anthem Expansion

Dear Planning Office,

I have been frustrated by the fact that city officials have signed non-disclosure agreements with an unknown entity developing a hyper scale data center in the East Tulsa. The tax incentives provided to the company, which presumably is Meta, have served to encourage that company to expand its physical footprint. I know the city says it has enough water, but I worry about future generations and water insecurity that is coming if we continue view the Earth is being an endless water tap.

I'm concerned that energy costs are rising a higher rate of inflation due to increased demands from large load customers such as data centers, and that many Tulsans are really struggling to pay their bills this year promises to be a hotter year due to El Niño so it's gonna be tough for people to remain comfortable.

I also don't like that there's been no published environmental impact study or plan from the company. The city does not have an sustainability plan, although it is in the process of developing one, and I think that this project should be viewed from that lens. We need to be reducing our carbon footprint rather than increasing it . Climate related goals are being thrown out due to demands of data centers for energy. we are on a dangerous course towards climate related natural disasters, water and food insecurity due to excessive heat an unpredictable seasonal rains

I don't think that hyper scale data center should fall into the of light industry for the following reasons

- Hyperscale
- data centers consume enormous amounts of energy and water in quantities similar to those required by small cities and require massive new public infrastructure.
- The
- 24/7 operation of computer servers and cooling equipment generates significant noise and light pollution.
- Before
- this proposed expansion, Project Anthem already plans to use a maximum of 1 billion gallons of water per year once it is fully operational.
- Back-up
- diesel-powered generators release harmful toxins in the air, which increase the risk of cancer, lung disease, and heart disease.

-
-
-
- Environmental
- regulations and greenhouse gas reduction plans are being rolled back due to increased demand for fossil fuels.
-
-
-
- The
- need for energy puts a significant strain on the power grid and could result in price hikes for consumers to fund new power sources.
-

Please vote now on expanding project Anthem's request for an additional 375 acres to build another data center.

Nancy Moran

My husband and I have lived on 23rd street near Lewis for over 30 years. We are deeply concerned over the recent explosion of DATA CENTERS in the area.

Construction and approval seems to be fast & furious without any detailed, independent studies or analysis of the future impacts for the local citizens.

These huge facilities offer very few long-term employment opportunities, but require enormous amounts of precious WATER and electricity.

Do the benefits actually out-way the costs and impacts to our local quality of life and the environment for Green Country's future??

Slow consideration seldom hurts in the long run. Tom & Linda Connor, Tulsa

Sent: Monday, March 16, 2026 10:26 AM
To: Tulsa Planning Office
Subject: [External Mail] Opposition to Proposed Data Center Rezoning

Dear Members of the Tulsa Metropolitan Area Planning Commission,

I am writing to express my strong opposition to the proposed rezoning for the additional data center development.

Tulsa should prioritize responsible growth that benefits residents. Converting agricultural land to industrial use for another large data center removes valuable space that could otherwise support much-needed housing and balanced development. At a time when housing costs are rising, using this land for industrial infrastructure instead of homes will only make the problem worse.

Data centers also consume enormous amounts of electricity and water to operate and cool their systems. This places additional strain on local utilities and water resources, which can ultimately lead to higher costs for residents and businesses.

Additionally, the lack of transparency regarding the company requesting this expansion raises serious concerns.
Decisions that shape Tulsa's future should be made with full transparency and with the best interests of residents in mind.

I greatly urge the Commission to reject this rezoning proposal and prioritize development that supports housing availability, responsible resource use, and sustainable community growth.

- Shelby Williams

From: Jordan Harmon <jordan@ienearth.org>
Sent: Monday, March 16, 2026 2:28 PM
To: Tulsa Planning Office
Subject: [External Mail] Vote NO on Project Anthem Phase 2

Hello, I am writing to request the Tulsa Metro Area Planning Commission to please vote no on the zoning for phase 2 of Project Anthem.

I am a Tulsa resident and Muscogee Creek citizen, and it is very important to me that Tulsa takes proper care of the land and resources in this area. Hyperscale data centers are too resource intensive to justify their presence in the Tulsa Metro area. I have heard reports that Tulsa water can only sustain two data centers of that scale, and there are already two underway including phase 1 of Project Anthem and Project Clydesdale. To add phase 2 of Project Anthem would put too much of a strain on the city water supply, and it is not fair to the residents or to the environment to allow the mass expansion of Project Anthem.

Additionally, I have concerns about the business practices and ethics of a company that presented a proposal for a 350-acre project to get the TMAPC and city council on board, and then pulled a bait and switch to demand an expansion of 375 acres before moving forward with the project. That would mean a total of 725 acres just for a hyperscale data center location. The mysterious companies involved would be deriving a much greater benefit from utilizing Tulsa land and resoures than Tulsa residents would receive from the massive data center being there. We don't know very much about Atmoss or whatever big tech company is associated with Project Anthem, but we do know that are willing to try to bully the city council into giving them more land. I do not think this is an appropriate business model for development in Tulsa.

Subject: [External Mail] Data Center #2

Dear Tulsa Council Members,

I am a resident of The Crossings at the corner of Sheridan and 86th St. We are thoroughly against another Data Center. It would be virtually in our backyards here so to speak. We had no real heads up about the first Data Center and felt it was snuck in without citizens having much of a say about it.You gave us a day to object but not to really listen to our fears and worries. Nor have we ever seen a full environmental impact report on this first Data Center. Actually none of any Data Centers completed in other states to see how this will truly affect us. Only hearsay and false reassurances, From our point of view, it is obvious that this company is trying to manipulate an approved project to sneak in a second drain on our resources in the area. IS Tulsa County that desperate for whatever is promised? I would hope not. Not only will they drain our power grids and water supply, which will skyrocket costs for us residents, WHERE DOES THE WASTE WATER GO?? Such polluted water must go somewhere. Do they plan on Class IV water injection disposal wells and if so, into what zone and how deep? Also for how long before a zone cannot support the volumes? Then what? Shut it down and move to strip another area? So what is their plan? What happens once they have decimated our fresh water sources for residents? What happens to us with triple power costs, our homes and livelihoods ruined? An "Oh we are sorry. We didn't see that coming." is not going to cut it. This KNOWINGLY is equal to the strip mining of our resources but without the ugliness. It is hidden from view. We do feel this corporation is using the threat of cancelling their contract as leverage to get what they want. LET THEM CANCEL!! There is already something not right about all these Data Centers being approved in so many of the surrounding areas of Tulsa in the first place. Here outside Owasso, Sand Springs, Coweta and Claremore. ARE there more being planned under NDAs other outlining towns are not yet aware of? Something is glaringly rotten here and we as citizens should not be facing skyrocketing utilities and 5G/6G radiation exposure to line someone else's pockets!! We are Extremely concerned with what the future holds for us and other homeowners here. We had neighbors put their home up for sale once we got notified of the first Data Center. His home market value dropped from $475k down to a sale price of $322k. Are you going to re-evaluate 3 upscale neighborhoods along with several others in the immediate area and cut our property taxes down by 1/2 to compensate us for the reduced home sale/market values due to your already far impacting decision? We cannot see how you can keep our property assessments going up yearly while our fair market values are plummeting with just ONE impending Data Center. You will have entire neighborhoods taking you to court over that.

We moved here to a neighborhood in the outskirts/country to enjoy the deer herds, the mooing of the cows in the evenings and wild turkeys winging it across the pasture. Now it has all been stripped away. What was once a thriving eco system across the road is down to a thin line of trees to obscure the construction site of not one but now possibly two huge data center buildings. We have no real long term environmental impact studies to show how living within a 1 mile radius of just one of these data centers will affect us in the long run. It appears Tulsa is really jumping the gun approving so many to be built. Already we have citizens in other states saying their utilities have more than doubled. WE CANNOT AFFORD THAT!!! We are seniors on pensions and that would make our life here just about impossible. I am on home oxygen 24/7 and require my home to be heated and cooled comfortably because it affects my damaged lungs. Higher utility costs would greatly affect me and my basic needs and comfort

to exist in my own home! To sell would wipe us out and we are out priced for anything comparable to what we have. This is not okay at all. It is destroying all of us one way or another here in the area!

Let the Data Center pull out of their contract! REzone the area for small homes that first time homebuyers can actually afford. Get the tax revenues from something like that instead. I doubt a neighborhood would use anywhere near the 24/7 pull on our power grids and water. That would be better for everyone here, the local economy and our environment. Perhaps Tulsa County would actually finish the road widening project on 86th St from Sheridan to Memorial and on to hwy 75 in the process?

But in all seriousness, we feel this is something that has been started without fully assessing the outcomes to citizens, residents, our future health, wildlife and our natural resources as well as power grids. Please do not ruin our homes, neighborhoods and area with this pair of Data Centers. I fully believe this company KNOWINGLY has led the Tulsa County Board astray without fully disclosing their plans to build an additional one. Would they not be in violation of the agreement? They are exploiting "fly over" country for their profits and it is wrong on many levels. Somewhere down the line You of the Tulsa County Board must put the CITIZENS FIRST over any compensations you are being persuaded with. They are NOT for our own people. We all know these centers will be built by companies who will bring their own contractors and workers to build them. Then they will transfer existing employees here from other centers to run them. There will be very little job growth for any long term Tulsa County residents. We aren't foolish enough to believe these companies have our city and county's residents best interests at heart. They are looking for little to no environmental oversight and affordable land. We aren't a bunch of 'dumb okies" to be bamboozled. There is NO real payoff or asset to Tulsa County with these being built here. I ask you all to PLEASE reconsider how such Data Centers like these will harm our community. Let them pull out of this deal. Tulsans have more common sense than to be pushed to do what is against our people's best interests and futures.

Respectfully,
Karen & Mark Montoya

Roark, Erin

From: Ayden Townsley <aydentownsley@gmail.com>
Sent: Monday, March 16, 2026 11:03 PM
To: Tulsa Planning Office
Subject: [External Mail] Cease current and future data center plans

Planning Commission,

As public servants to the people of Tulsa, you understand your choices are meant to empower and help Tulsans. Data centers are antithetical to that goal. I am writing to strongly and passionately emphasize that no member of Tulsa wants these projects built here. They offer nothing and consume massive amounts of money, time, and resources that could go to developing local businesses and enterprises.

As a person who has worked in Information Technology I can attest that data centers are not power houses of job growth. Having visited several, they often have an active staff of 5 or less people while taking up massive plots of land. They use massive amounts of power and water, and already, there are countless examples of how they do not consider local impact. Many people have been left paying astronomical energy bills, and either contaminated water of their water pressure is useless, leaving them without a basic need for everyday life.

These large companies don't care, they want to pretend they offer so much to the community but they are leeches.

Please, consider pausing all current and future development until a LEAST there is legislature, ordinance and protections against the incredibly destructive effects that data centers have on communities.

I will hold the members of this council accountable for any detrimental impacts to the people of Tulsa that are caused by data centers being built in and around Tulsa. These are people's lives that are being impacted. It's not a small issue. These building need to be far away from people (and likely limited in number). Currently no legislation exists to coral the rapid development and until such legislation exists I do not want any being built.

Thank you for your time,

Ayden Townsley

Subject: [External Mail] No Data Centers in Tulsa

As a Tulsa resident, I can confidently say my community and I fully oppose project Anthem. We do not need any more data centers in Tulsa especially when you have to rezone agricultural land to do so. Data centers do not bring job opportunity or job stability to the areas they are planted, often only employing merely 5-10 people.

Data centers suck communities of every resource they can. They use excessive amounts of water and leave water quality much worse. Data centers consistently raise the cost of energy bills in the surrounding areas. I have also seen the detrimental health impacts of residents in the vicinity of Data centers. These centers are not worth tax payer dollars.

If this council is focused on protecting and uplifting the Tulsa community then they have no other option but voting to stop data centers. I will remember and hold this council accountable for their actions; these individuals will be responsible for any impact the data centers have on Tulsa locals.

Vote No to Data centers and shut down project Anthem.

Thank you for your time
-Taylor Townsley

Subject: [External Mail] Oppose Project Anthem z-7851

Howdy,

My name is Josh Speer and I live in Tulsa, OK zip code 74105.

I oppose the expansion of Project Anthem z-7851. I support a moratorium on the implementation of any data centers. Carol Bush should recuse herself as she has admitted to having a conflict of interest regarding this industry. NDAs are directly against the citizens interest in transparency. If there are NDAs that must end.

Thank you for your hard work and for considering my concern,
Josh Speer

It will cost Tulsa an average of $33 million to create one job in data centers when one takes into account all the perks that a company will obtain from the city and possibly the county.

These companies always Target low-income power states with poor outcomes in a variety of issues such as health, longevity, housing, infrastructure, and education.

You are aware of why Devon energy left Oklahoma City leaving only a skeleton office.
Let's focus on improving our schools to bring in better-paying jobs so that we don't lose quality companies to Houston and other states.

No to Data Centers

Subject: [External Mail] Project Anthem Phase 2

Hello Planning Commission,
I am a resident of Tulsa City district 6.
I am writing to implore you to reject phase 2 of project Anthem for the following reasons;

1. quality of life for those living near the development will be permanently impacted.
    a. permanent noise pollution 24/7, including infrasound pollution that has been proven to have lasting health impacts. Infrasound cannot be blocked by sound barriers.
2. not an appropriate use of land and will impact future housing developments.
    a. The fair oaks development was just approved and any future housing in the area will be impacted. Not only will property values be impacted but future tax revenue will be impacted.
3. concerns for the withdrawal of city municipal water for this development.
    a. with both Project Anthem Phase 1 and Clydesdale pulling from the city of Tulsa's municipal water, a real study should be completed around the capacity of not only the current implications that this could have on citizens of Tulsas water but the future impacts that approving more hyper scale data centers could have on citizens.
4. concerns about ground water contamination of furthering hyper scale data center development in Tulsa
    a. Water pulled from the city is treated with many forever chemicals that can not be removed from the water cycle prior to being sent back into our water cycle.
5. These developments are not a long term economically viable solution to benefit the boarder Tulsa community.
    a. Many states are reporting billions lost in tax revenue due to data center developments.

Thank you for your attention,
Cheyenna Morgan

Subject: [External Mail] No New Data Centers

Dear Tulsa Metropolitan Area Planning Commission Members,
I'm a Bixby resident and am writing to say I'm 100% against any new data center projects. "Project Anthem" is ridiculous. It will increase energy cost for residents and not provide enough new jobs to make wasting ONE BILLION gallons of water a year worth it.
This is a bad deal for Tulsa and for the state.

AI is not the way of the future:
"The tool that everyone tells you is 'creative' and 'revolutionary' is architecturally incapable of doing anything other than averaging what already exists. It is a statistical summary of the past masquerading as a window into the future."
-*https://substack.com/home/post/p-187213882*

AI is destructive, wasteful, terrible for the environment, makes people more stupid (this has been proven), and an unfair burden for Oklahomans.

I know money always wins out in the end but please consider the harm your actions will cause before allowing this terrible project to move forward.

Sincerely,
AC Neil

Subject: [External Mail] Assessment of benefits and risks of Anthem Phase 2

TMPAC members:

I wish to speak out in opposition to current data center expansion, specifically Anthem Phase2. A complete, objective, and transparent assessment of the advantages and detrimental features of data center operation must be completed before approval of this project. Proper regulations coming from that assessment, including amelioration of the health risks involved, must be put into place before further expansion is approved.

While advanced computing offers many advantages, it also involves significant costs to many of the citizens of this area. For example, data center operation involves significant health risks to nearby residents due to the noise these centers generate. The constant humming or buzzing has been associated with increased headaches, stress and sleep disturbances, cognitive impairment, and cardiovascular risks. It may also cause tinnitus and hearing loss.(1,2)

The articles cited below summarize the research about the adverse health effects associated with noise pollution. They also point to strategies for dealing with this problem.

You are responsible for recognizing both the benefits and costs of data center operation. I assume that you are aware of the benefits. I hope that you carefully assess all of the health risks that are involved. And I hope that you take the time to conduct a careful evaluation of these risks.

Until such an evaluation is completed and made public, please deny approval of more data centers.

Dr Richard Bost

Subject: [External Mail] Opposition to Project Anthem Rezoning

Dear Tulsa City Council Members,

I urge you to vote **NO** on the proposed rezoning associated with Project Anthem.

This plan would convert hundreds of acres of agricultural land into industrial use for data centers—facilities that demand enormous amounts of electricity and water while offering relatively limited long-term jobs. The environmental trade-offs are significant: increased strain on our power grid, higher emissions risk, heavy water consumption, and the permanent loss of valuable green space and farmland.

Tulsa's growth should not come at the expense of its natural resources and long-term sustainability. Once this land is rezoned and developed, there is no going back.

Please prioritize responsible planning and the well-being of our community by **rejecting this rezoning**.

Sincerely,

Shonday Randall

Subject: [External Mail] Project Anthem & Data Center Moratorium

Please vote YES on the data centers' 365-day Moratorium and vote NO on the request for 300+ additional acres that has been submitted for the Project Anthem area.

- **Why have several states banned data centers from being built?**
- **If even one more data center is approved for NE OK, much less the several that are proposed, how soon will the water table be affected, also will personal wells go dry, will the water level on surrounding lakes decrease, will available drinking water be in jeopardy, will rivers dry up**
- **data center emissions could more than double by 2030, becoming one of the fastest growing sources of greenhouse gases IN THE WORLD**
- **data centers are documented to potentially impact ground water & energy grid within a 20-50 mile radius**
- **a data center can require as much power as 100,000 - 200,000 homes depending on its size**
- **there are more than 600 homes within 3 miles of Project Anthem, the long-term HEALTH RISKS of data centers is unproven so far but VERY PROBABLE: are you concerned about your constituents or only about the $$$$ promised**

IF ANY OF YOU LIVED CLOSE TO A PROPOSED DATA CENTER WOULD YOU WANT IT TO BE APPROVED, with all the unanswered questions/concerns that you've heard about & read about? More time & energy needs to be devoted to gathering all the pertinent information before long-term & irreversible effects are experienced. PLEASE consider before recklessly approving even more acreage to Project Anthem. Approve the moratorium PLEASE.
(just FYI: Sand Springs officials {with much opposition} approved a data center. Of the 5 people we researched these are the distances they live from the data center.....22 miles, 15 miles, 8.8 miles, 7.3 miles, 4 miles)
(Coweta officials {potentially facing a lawsuit}.....3-6 miles

Subject: [External Mail] Data Center / Project Anthem Phase 2

To whom it may concern,
the plans for a data center in Tulsa via Project Anthem will lead to a waste of land set aside initially for housing. With the present affordable housing shortage in the city, these plans seem short-sighted, not to mention the amount of resources they will take in the way of water and electricity. This will not benefit Tulsa in the long run and will surely meet with many citizens' disapproval.

Sincerely,
Samuel A. McElroy

Subject: [External Mail] NO AI Data Centers

Hello I am a concerned citizen and a registered independent voter from Tulsa precinct 7200051.

The data centers needed to train AI can consume as much electricity as 200,000 American homes.

A Bloomberg News analysis in September found wholesale electricity costs as much as 267% more for a single month than it did five years ago in areas with significant data center activity. This is not a cost many people in Tulsa could afford. That will lead to a worsening of the homelessness crisis in Tulsa.

When data centers are operating, they provide only a small fraction of the amount of jobs that a similarly sized factory or office park would employ. That is not sufficiently contributing to the local economy.

Ai data centers is a complicated issue that will need significant regulations to protect the best interests of the citizens, not just the corporations. Until thorough regulations are in place, I think no more data centers should be built.

Thank you for your attention to this matter.

Subject: [External Mail] TMPAC

As a long time resident of Catoosa, Fair Oaks community I want to express my concerns of rezoning for this rural housing community. We were blindsided with the first rezoning decision made by Tulsa for this Wagoner county community. Project Anthem data center would have been met with strong opposition if the council meetings would have been held in our community instead of downtown Tulsa.

Now you want to rezone more land and add another data center? We need more housing for our community, not another data center. These large data center drain our resources and pollute. Our electric and water bills will go up. And where will the recycled water go? Noise pollution right in our backyard so to speak.

We need a moratorium on these fast pace data companies trying to flood our state and require NDA's to be signed by council members. What are they hiding? Now they want more land that was not part of the original deal. Please say NO to this additional land gram and let them go elsewhere!

Thank you for your time,
Barbara Pippin

Subject: [External Mail] Strong Objection to Proposed Data Center - Anthem Phase 2

To Whom it May Concern,

Good Morning,

My name is Rachel Steed, I am a resident of Tulsa County, artist, and small business owner. I am writing today to **express my strong objection to the data center** currently being considered as an addition to the Anthem Phase 2 work.

This data center was not included in the original proposal **and should not be considered now for that reason alone.** New Data Centers should be required to submit their own, individual proposals for consideration, not snuck into existing contracts to bypass citizen input.

Tulsa does not need a new data center, we need housing. I live in Midtown and am privileged to live in a neighborhood that is a neighborly and friendly place, this includes our unhoused neighbors who live in the area. Many of them work, many of them are actively trying to find work while maintaining sobriety, all of them deserve better than what this city has to offer.

Additionally, and perhaps anecdotally, my water and electricity bills have been steadily increasing over the past year as more data centers have infiltrated our area, I moved to Tulsa for affordability, these data centers are making that impossible.

Do not allow this data center to be part of any stage of this proposal.

Thank you for your time and attention,

Rachel Steed

Subject: [External Mail] Data Center Opposition

Dear members of the Tulsa Planning Commission,

My name is Juni Peraza, I am a citizen in Tulsa and I'm emailing to express my strong opposition to the proposed rezoning for the additional data center development.

These centers and companies do nothing but deceive and extract from our communities we work so hard to build and mantain. The communities we pay you to serve and protect adequately. This will only bring the extraction of our water supply, energy, our beautiful land, the public's hard earned money, so many resources- all to go towards an economically declining industry.

It has been shown over and over again, that these centers do not bring in the jobs they promise. And everything they take falls on the public to deal with.

It is ridiculous to consider this project at this time, when we could so easily utilize all of the resources described towards something better for this city. Because Tulsans deserve so much better than this.

I was a public servant for three years, I know the work. It can be difficult to center yourself back to serve the people that are in front of you rather than the collection of problems you have to solve - I say try. I say act and decide bravely for your people instead. Think of the children, parents, workers in this city that this will negatively impact - the ones that do not quite understand the future implications of this decision as much as you should. Think of your people. Take care of them.

Thank you,
Juni Peraza

Subject: [External Mail] NO DATA CENTERS!! Vote NO for rezoning land for Anthem.

Hello,

I'm a resident of Tulsa who DOES NOT WANT A DATA CENTER HERE. Not. Even. One. Anthem should have NEVER been approved to begin with, so VOTE NO on this plan to add a second data center. Tulsans are already struggling as it is. Our city is growing, and **adding data centers will create a strain on resources and infrastructure** that will drive many people away, and significantly harm those who can't leave.

Tulsa does not want this!

We've seen the harm data centers have brought to other cities. I have friends in Tennessee and Georgia who've seen their electric bills skyrocket, their water reduced, and their air polluted. Voting yes and adding ANY data centers to the Tulsa area will only benefit wealthy people who don't live here, and harm actual working class Tulsa citizens who keep our city running.

So as you make this decision, make the right choice for TULSA.

VOTE NO!!!!

Sincerely,
--

Subject: [External Mail] Comments re: Proposed Project Anthem Data Center

Hi city staff,

I am a Tulsa resident (zip code 74105) and am writing to express my concerns about the proposed Project Anthem data center that I believe is on today's (3/18) planning meeting agenda. I am concerned at the speed at which these projects are being pushed into our communities and what the public health and environmental impacts will truly be. These are huge projects that should be heavily scrutinized and held to the highest standards. What are the impacts to our electrical grid? Utility prices? Water availability (what happens when we face severe drought again)? Wastewater discharge? Do the investors/company behind the project have a good track record of complying with local, state, and federal rules and regulations? Has the city considered other environmental impacts like noise pollution? Most of the jobs created will be temporary construction jobs; long term jobs at data centers are minimal and mostly consist of security and technicians. Has the city conducted a comprehensive study or any kind of cost benefit analysis?

Thank you for your time and consideration.

Best regards,
Jessika Gunn-Reece

To: Tulsa Planning Office
Subject: [External Mail] Vote no to approving Project Anthem expansion

To the Tulsa Planning Commissioners,

I urge each of you to VOTE NO today on the 375-acre expansion of Project Anthem. Your duty as City of Tulsa planning commissioners is "to help guide future development and public investments for the city with a focus on improving the quality of life for local residents" according to the Tulsa Planning office website. I want you to consider that voting yes today will not improve the quality of life for Tulsans, but quite the contrary. Hyperscale data centers grab beyond their fair share of electricity, water, property tax give aways, locally funded emergency services, and more. The noise pollution wreaks havoc on local residents as well as the draining of precious water resources. Local residents will also be footing the bill for improvements to local energy infrastructure, with PSO already admitting that the recent 15% rate hike is due to data center demands.

You have a responsibility to protect Tulsa residents by placing their needs before the needs of a multi-million dollor tech company. Do not be seduced by their status and charm. Do the right thing as public servants, and stand for your fellow Tulsans first. Vote no to the Project Anthem expansion.

Sincerely,

Neera Singh

Subject: [External Mail] No More Data centers

Planning Commission,

As public servants to the people of Tulsa, your choices are means to empower and support the Tulsa community. These data centers use so many resources that would better be put into local enterprises and small businesses.

These data centers do not employ nearly enough staff to offset the cost of rising electric bills and water shortages in the areas they are planted. They are bad for the environment but even worse for job stability in Tulsa.

These large companies don't care, they want to pretend they offer so much to the community but they are leeches.

Please, consider pausing all current and future development until a LEAST there is legislature, ordinance and protections against the incredibly destructive effects that data centers have on communities.

I will hold the members of this council accountable for any health, economic, and detrimental effects that are caused by data centers being built in and around Tulsa. These are people's lives that are being impacted. It's not a small issue. These building need to be far away from people (and likely limited in number). Currently no legislation exists to coral the rapid development and until such legislation exists I do not want any being built.

Thank you for your time,

Taylor Townsley

Subject: [External Mail] Strong opposition to Data Centers

Dear Tulsa Planning Commission Members,

I am writing because I am opposed to re-zoning to accommodate additional data center development. Please do not allow this to happen. Tulsa needs housing and balanced development, and has already shown that we are not very good at prioritizing clean air and water (I smell the refineries and the trash we burn; I see the oil slicks on the river).

I was born here, and have lived here most of my life. I assure you that data centers in Tulsa will not benefit those of us who live here. I would not want to raise children near a data center, and neither would you.

Thank you, please do not let this happen.

Katherine Hair Eagle

Subject: [External Mail] Please no data centers

Dear Members of the Tulsa Metropolitan Area Planning Commission,
I am writing to express my strong opposition to the proposed rezoning for the additional data center development.
Tulsa should prioritize responsible growth that benefits residents. Converting agricultural land to industrial use for another large data center removes valuable space that could otherwise support much-needed housing and balanced development. At a time when housing costs are rising, using this land for industrial infrastructure instead of homes will only make the problem worse.
Data centers also consume enormous amounts of electricity and water to operate and cool their systems.
This places additional strain on local utilities and water resources, which can ultimately lead to higher costs for residents and businesses.
Additionally, the lack of transparency regarding the company requesting this expansion raises serious concerns.
Decisions that shape Tulsa's future should be made with full transparency and with the best interests of residents in mind.
I greatly urge the Commission to reject this rezoning proposal and prioritize development that supports housing availability, responsible resource use, and sustainable community growth.
I know for a fact if this data center gets built me and my entire family will have to move far away from Tulsa as our lives will be greatly negatively effected by said data center please listen to your citizens hear our cries for this rezoning proposal to be rejected data centers will only hurt us

Subject: [External Mail] Data Center Development

Dear Members of the Tulsa Metropolitan Area Planning Commission,

I am writing to express my strong opposition to the proposed rezoning for additional data center development.

Tulsa must prioritize responsible growth that directly benefits its residents. Converting agricultural land to industrial use for another large-scale data center eliminates space that could otherwise support much-needed housing and more balanced development. At a time when housing costs continue to rise, dedicating this land to commercial infrastructure rather than residential use will only exacerbate the problem.

Data centers also require substantial amounts of electricity and water for operation and cooling. This level of resource consumption places added strain on local utilities and water supplies, which can ultimately result in higher costs for both residents and businesses.

Furthermore, the lack of transparency regarding the company requesting this expansion is deeply concerning. Nationwide, similar facilities have been widely criticized for failing to disclose accurate data on water and energy usage, as well as for their impact on light pollution and surrounding environments. There is no indication that this proposed development would be any different.

It is also important to note that data centers typically generate minimal long-term employment opportunities, offering limited economic benefit relative to their significant resource demands. This imbalance makes the proposed development far more exploitative than beneficial to the Tulsa community.

Decisions that shape Tulsa's future must be made transparently and with the clear priority of serving residents' long-term interests. I urge the Commission to reject this rezoning proposal and instead prioritize development that supports housing availability, responsible resource management, and sustainable community growth.

Sincerely,

Tina Wall
Resident, District 4

Subject: [External Mail] Regarding the Anthem Phase 2 Proposal

Good Day:

As a citizen of Tulsa I wanted to add my concerns regarding this proposal to the others received. I understand the council has agreed to delay discussions on this proposal, but I think no amount of delay is enough to address the concerns around this development.

It has already been reported that the developer failed to disclose their intention to build not one but two centers expanding their initial scope; given that even a single data center can use as much water as a city of 50,000 people adding two in such a close area seems even more environmentally reckless. Over 90% of Oklahoma has been experiencing drought since March of this year, and having moved from California where years of drought have only exacerbated our wildfires, I would caution you to conserve your resources before they are depleted. The true cost of these centers likely won't be realized until it is too late to reverse course.

The developer's lack of transparency is also very concerning, and the city should protect citizens from bad private actors who look to exploit our resources for profit by taking advantage of our generosity and affordability. Tulsa is a growing city with multiple opportunities to invest in our citizens and economy without relying on selling out our land/water/energy. Having read articles from other smaller towns that sold out to data centers out of desperation, and the negative impact that has had on their communities, I don't think this is the right path for Tulsa.

In addition the AI "boom" is very likely to turn "bust" as we've seen with past new technology trends, meaning this rash investment could end up going nowhere in the long term future and leave us searching again for alternatives after wasting our time/resources.

I have also read the city planning commission has recommended not to approve this proposal. Their professional opinions should reinforce my own amd other citizens' personal concerns.

Please vote quickly and decisively against this new proposed development. This deal places us at greater risk during a period of growing environmental dangers; it was not made in good faith or full transparency; and Tulsa has more going for it without having to cave in to these types of developers. Please save our land and resources for projects that invest in our citizens' priorities - affordable housing, sustainable and small businesses, and projects that conserve our resources and human dignity/potential.

Thank you,

Tera Watts

Dear Planning Commission,

I have lived in Tulsa my whole life. I love this town as well the people in it and I would hate to see our resources go towards the building of data centers that will poison our air and water. I strongly oppose the rezoning proposition that would allow more of these centers to be built. Tulsa needs affordable housing, not warehouses that drain our electricity and do not improve our community, contribute to our economy, or provide a significant amount of jobs. As a city, we are better than this.

Thank you for your consideration.
Jordyn Winetg

Subject: [External Mail] Case Z-7851. We were here first!

Why would they choose neighborhood living to build Data centers! We were here first. The wild life was here first. We have our homes that we raise kids in and pour our lives into. We now worry about the cost of things. The heavy traffic. The roads are small country roads. Now I worry about my kids driving on the roads with the extra traffic and huge work trucks that can't fit on roads. Why would they pick an area that has quiet neighborhoods and nice wild life. Doesn't make sense. Find some open land out of the way where no one cares. I'm worried about the noise, heavy traffic, cost of water and electric. We lost a grandson in a wreck driving on high way. I'm sacred to death my daughters are going to get run off road or hit by a MAC truck! Who's going to feed and house the animals that lost theirs homes and land to feed. Build the centers in industrial or empty areas. Not in neighborhoods!!! Really? Who thought of this. lol.

To: Tulsa Planning Office
Subject: [External Mail] Case Z-7851

Dear Members of the Tulsa Planning Commission,

I am writing to formally oppose Case Z-7851 and to respectfully request that the Commission deny this rezoning application.

My family has lived in this community for over 60 years. I am a third-generation resident, and my children are now the fourth generation growing up here. We have always understood that some level of development would occur over time. However, the continued expansion of heavy industrial use in this area, particularly the addition of another large data center, represents a significant and incompatible shift that this community is not equipped to support.

It is important to note that the electrical substation has already been constructed and that the rezoning and development of one data center have already been approved and are underway. This current request is not an isolated proposal. It is an expansion of an existing industrial footprint, and the cumulative impacts must be evaluated accordingly.

Cumulative Public Safety and Infrastructure Failures
The existing road infrastructure is already insufficient and unsafe. Narrow roads, blind curves, and limited shoulders create hazardous conditions for everyday travel. I have personally experienced multiple incidents where large trucks and semis hauling trailers have forced my wife and two small children off the roadway.

With one data center already approved and under development, traffic impacts are already increasing. Approving a second data center will compound these issues significantly. The City has failed to proactively address infrastructure deficiencies, including basic maintenance such as trimming roadside trees that have caused damage to my vehicles and those of my neighbors.

Approving additional industrial traffic without first resolving these known safety hazards demonstrates a disregard for foreseeable risk and public safety.

Construction Noise, Ongoing Industrial Noise, and Community Disruption
Residents are already experiencing the impacts associated with the current development. The addition of another data center will extend construction timelines and significantly increase the duration and intensity of disruption.

Construction activities will bring prolonged heavy equipment operation, constant truck traffic, dust, vibration, and early morning and late evening noise. This is not a temporary inconvenience. It will span extended periods and directly interfere with the quiet use and enjoyment of our homes.

Beyond construction, data centers operate continuously. This introduces ongoing noise from cooling systems, electrical equipment, and associated infrastructure. The addition of a second facility in close proximity will amplify these effects and further erode the residential character of the area.

Environmental Degradation and Runoff Impacts
Environmental issues are already present and will be worsened by continued expansion. Muddy road conditions, construction runoff, and sediment accumulation in nearby creeks are already occurring.

Adding another large-scale industrial facility will increase impervious surfaces, stormwater runoff, and erosion. This will further degrade local waterways and surrounding land. These impacts are cumulative and will intensify as development expands.

Property Value Impacts and Incompatible Land Use Expansion
The expansion of industrial zoning and the addition of another large data center and supporting infrastructure will have a direct and negative impact on surrounding property values.

Homeowners made long-term investments in a community that was not intended to support clustered industrial development of this scale. The continued expansion of this footprint diminishes desirability, increases noise and traffic, and fundamentally alters the nature of the neighborhood.

This is no longer a question of isolated development. It is the incremental conversion of a residential area into an industrial corridor, and the burden of that transition is being placed on existing residents.

Long-Term Financial and Utility Burdens
The infrastructure demands associated with multiple data centers and a major substation are substantial. Power, water, and roadway systems will require continued expansion and reinforcement.

There is a legitimate concern that these costs will ultimately be borne by residents through increased utility rates and taxes. There has been no clear or enforceable commitment that the industries driving this demand will fully fund the infrastructure required to support it.

Uncertain and High-Risk Long-Term Consequences
The addition of a second large data center to an area that was not originally designed for this level of industrial intensity introduces significant uncertainty. The long-term impacts on power demand, noise levels, environmental conditions, and infrastructure strain are not fully understood.

Approving continued expansion without a comprehensive, transparent evaluation of these cumulative impacts places the community at unacceptable risk. This is not responsible planning. It is a piecemeal approach that allows industrial use to expand beyond what the area can safely and sustainably support.

This rezoning request represents an expansion of an already impactful industrial development into an area that lacks the infrastructure, planning, and safeguards necessary to protect its residents.

I respectfully urge the Planning Commission to deny Case Z-7851 and to require a comprehensive review of the cumulative impacts of existing and proposed industrial development before any further expansion is considered.

Thank you for your time and consideration.

Sincerely,
Gavin Johnson
