Staff Recommendation

Staff recommends approval.

Request Summary

Rezone subject properties from AG to RS-5 and RD to
permit single-family residential and duplexes.

Zoning

Existing Zoning: Agriculture (AG)

Existing Overlays: None

Proposed Zoning: Residential Single-Family 5 (RS-5) and
Residential Duplex (RD)

Use

Current Use: Vacant

Proposed Use: Single-Family Residential and Duplexes

Comprehensive Plan Considerations

Land Use

Land Use Plan: Neighborhood, Local Center

Small Area Plans: None

Development Era: Future Growth

Transportation

Major Street & Highway Plan:

South 193rd East Avenue – Primary Arterial

East 31st Street South – Secondary Arterial

planitulsa Street Type: N/A

Transit: N/A

Existing Bike/Ped Facilities: None

Planned Bike/Ped Facilities: Sidewalks

Environment

Flood Area: City of Tulsa Regulatory Floodplain

Tree Canopy Coverage: 0-10%

Parks & Open Space: N/A

Detailed Staff Recommendation

The applicant is proposing to rezone the subject property from AG to RS-5 and RD to permit single-family residential development and duplexes.

The application is consistent with several other rezoning requests that have been approved in the immediate area. There is existing RS-5 zoning to the south. The property is adjacent to two arterial streets, South 193rd East Avenue and East 31st Street South.

RS-5 permits detached houses by right with a minimum lot width of 30' and a minimum lot area of 3,300 square feet and is considered the highest density single-family residential district. RD permits detached houses and duplexes by right and requires larger lots than the proposed RS-5 zoning. RD requires a minimum lot width of 50 feet and a minimum lot area of 5,500 square feet.

Prior to permits being issued for any new construction, a subdivision plat will be required to be approved along with plans for all public infrastructure including water, sanitary sewer, stormwater, and street design. Public infrastructure will be reviewed for compliance with all City of Tulsa standards prior to approval of new subdivisions. An associated preliminary plat for the subdivision is included on the agenda as Amethyst Falls.

RS-5 and RD are consistent with anticipated development pattern in the surrounding area and the neighborhood land use designation and accommodate a desired outcome of different housing types.

With consideration given to the factors listed herein, staff recommends **approval** of the application.

Comprehensive Plan Considerations

Land Use Plan

Most of the subject property is designated as neighborhood. Neighborhoods are mostly residential uses, which includes detached, missing middle, and multi-dwelling unit housing types. Churches, schools, and other low intensity uses that support residents' daily needs are often acceptable, particularly for properties abutting Multiple Use, Local Center, or Regional Center land use areas. Multi-dwelling unit housing that takes access off an arterial is considered Multiple Use, Local Center, or Regional Center. If a multi-dwelling unit housing property takes access from a lower-order street separated from the arterial, then it would be considered Neighborhood.

A small portion of the property located at the northwest corner of East 31st Street and South 193rd is designated as local center. The area designated as local center is contained within a designated floodplain boundary and will be utilized for stormwater infrastructure and community amenities.

Surrounding Properties:

<u>Location</u>	<u>Existing Zoning/Overlay</u>	<u>Existing Land Use Designation</u>	<u>Existing Use</u>
North	AG	Neighborhood/Parks & Open Space	Agriculture/Vacant
East	AG	Employment	Vacant
South	RS-5	Neighborhood/Local Center	Residential
West	AG	Parks & Open Space	Vacant/Reservoir

Small Area Plans

The subject property is not located within any adopted small area plans.

Development Era

The subject property is in an area designated as Future Growth.

These areas of the city have yet to be developed beyond agricultural uses, and they present opportunities to ensure the pattern of development is efficient and fiscally responsible. These areas typically do not have subdivision streets or connectivity beyond the mile-by-mile grid, have poor public service distribution (fire, police, transit, etc.) and lack utility infrastructure (water, sewer, broadband, etc.) Some areas also include exposed bedrock and/or extreme slopes. Priorities in these areas include ensuring the ability to provide adequate public services, the implementation of planned streets in the Major Street and Highway Plan, land use planning to establish frameworks for decision making, and conservation of natural areas.

Transportation

Major Street & Highway Plan: South 193rd East Avenue is designated as a primary arterial which requires an ultimate right-of-way width of 120 feet. East 31st Street South is designated as a secondary arterial which will require an ultimate right-of-way width of 100 feet.

Comprehensive Plan Street Designation: N/A

Transit: None

Existing Bike/Ped Facilities: None

Planned Bike/Ped Facilities: Sidewalks

Environmental Considerations

Flood Area: The subject property contains City of Tulsa Regulatory Floodplain.

Tree Canopy Coverage: Tree canopy in the area 10%. Preserving the limited existing canopy should be encouraged, as well as measures to increase the canopy through landscaping. Street-lining trees in particular should be encouraged to spread the benefit of the tree canopy to the pedestrian realm.

Parks & Open Space: N/A

Zoning History

Ordinance 11818, dated June 26, 1970, established zoning for the subject property.
