Planning Commission**

Project Anthem Plat Extension

Hearing Date: May 20, 2026

Prepared by: Austin Chapman

achapman@cityoftulsa.org

918-596-7597

Owner and Applicant Information

Applicant: Olsson, Inc. – John Flaxbeard

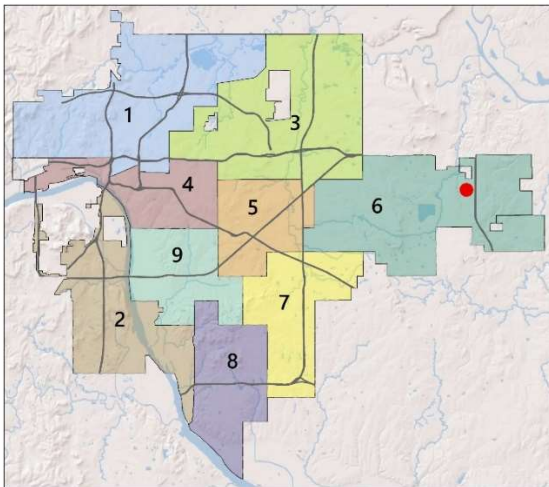

Property Owner: Atmoss LLC

Property Location

West of the Creek Turnpike between East 11th Street
South and East 21st Street South

Location within the City of Tulsa

(shown with City Council districts)

Elected Representatives

City Council: District 6, Christian Bengel

County Commission: District 1, Stan Sallee

Public Notice Required

Mailed Notice to adjacent property owners a
minimum of 10 days in advance

Staff Recommendation

Staff recommends approval of the extension to
08/07/2027.

Request Summary

Extension of the approval of the Project Anthem Plat that
expires on 8/07/2026. The request is to extend the approval
to 08/07/2027.

Tract Size: ±339.11 acres

Zoning

Existing Zoning: IL

Existing Overlays: None

Proposed Use: Data Center

Exhibits

Tulsa Comprehensive Plan Land Use Map

Project Anthem Plat

Detailed Staff Recommendation

Staff recommends approval. In recommending approval staff
finds the following to be true:

- a) Circumstances affecting the timing of final plat
approval have changed and are beyond the control of
the applicant;
- b) The applicant can meet the new deadline despite
changed circumstances;
- c) All aspects of the planning commission's original
decision to approve the preliminary subdivision plat
will continue to be valid if the extension is granted;
- d) There are no significant changes in or near the area
included in the preliminary subdivision plat have
occurred or are expected to occur within the extension
period that would change the evaluation of the
preliminary subdivision plat; and
- e) The provision of public facilities and services in the
area will not be disrupted if the extension is granted.

RE: Project Anthem Plat Extension

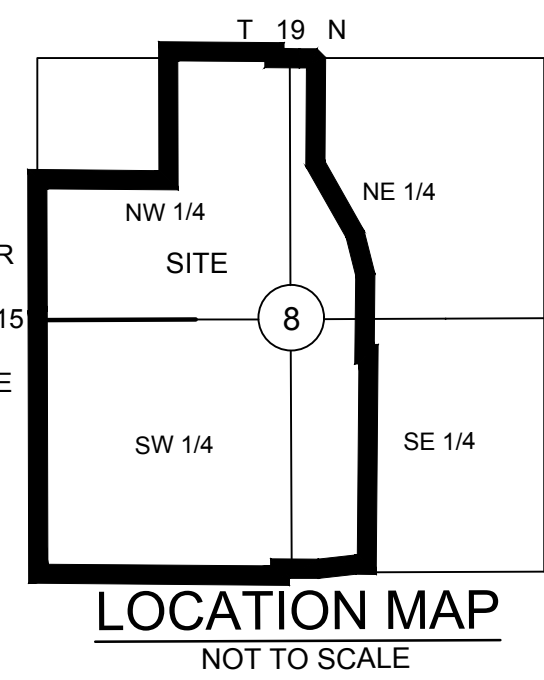

Dear Mr. Foster:

On behalf of our client, Atmoss, LLC, we are requesting a one (1) year Plat Extension for "Project Anthem". The preliminary plat was approved by TMAPC in August 2024. The two (2) year deadline is upcoming in August 2026. Offsite IDP construction is expected to be completed May of 2026, and the onsite detention IDP will be completed within the 1-year extension period, if approved. Should there be any questions, please let me know. Again, we would like to thank you for the opportunity to provide you with this proposal. Should you have any questions or comments, please call.

Sincerely,

John Flaxbeard, PE
Senior Engineer

Date: _____

OWNER'S OF RECORD:
Fair Oaks Ranch, L.L.C.
Wagoner, OK 74467

FEMA 100-YEAR FLOODPLAIN:
The proposed development is in the Zone X of firm map 40145C0040J, area determined to be outside the 500-year flood and protected by levee from 100-year flood, with an effective date of 09.30.2016

ZONING: IL
Industrial, Document # 25211

LEGAL DESCRIPTION:

A TRACT OF LAND LOCATED IN SECTION 8, TOWNSHIP 19 NORTH, RANGE 15 EAST OF THE INDIAN BASE AND MERIDIAN, WAGONER COUNTY, STATE OF OKLAHOMA, ACCORDING TO THE UNITED STATES GOVERNMENT SURVEY THEREOF, SAID TRACT OF LAND BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

[illegible]

GENERAL NOTES:

1. This Survey meets the requirements of the Oklahoma Minimum Standards for the Practice of Land Surveying which was adopted by the Board of Registration for Professional Engineers and Land Surveyors November 1, 2020.
2. **BASIS OF BEARINGS:** Measured N 01°35'51" W along the west line of said SW/4 8-T19N-R15E: Oklahoma Coordinate System of 1983 North Zone as established by use of ODOT continuously operating GNSS RTK Network.
3. All distances shown herein are based on Ground Distances measured in U.S. Survey Feet.
4. Field work was completed on April 10, 2024.

SURVEYOR'S CERTIFICATE:

I, Darrel Ray Mason, a registered Land Surveyor, do hereby certify that a careful survey has been made under my supervision on the above described property as shown hereto and there are no encroachments except if shown hereon. This survey was made for the above stated purpose only and no other responsibility is hereby assumed. Dated in the County of Wagoner, Oklahoma on this day of 6/27/2024

			EXISTING MAJOR CONTOUR
			EXISTING MINOR CONTOUR

1. IMPACT TO DELINEATED WETLANDS ANTICIPATED. DISTURBANCE IS ANTICIPATED TO BE LESS THAN 0.5 ACRES. REFERENCE EXISTING CONDITIONS PLAN.
2. ESTIMATED LIMITS OF ROCK EXCAVATION (BASED ON UNIFORM ROCK DEPTH OF 3'; ACTUAL ROCK DEPTH WILL VARY)
3. GRADING SHOWN DEPICTS CONCEPTUAL GRADING TO 5' CONTOUR LEVEL OF DETAIL.
4. GRADING DESIGN AND EARTHWORK STRATEGY ARE PRELIMINARY. GRADING STRATEGY INTENT IS TO BALANCE EARTHWORK ON-SITE.
5. EXISTING SURFACE IS BASED ON TOPOGRAPHIC SURVEY BY OLSSON DATED NOVEMBER 2022.
6. NO RETAINING WALLS ARE CURRENTLY PLANNED.
7. ROCK IS PRESENT ON-SITE. REFERENCE GEOTECHNICAL REPORT NOTES.
8. THERE ARE NO KNOWN AREAS OF CONCERN DISCUSSED REGARDING THE PHASE I ENVIRONMENTAL SITE ASSESSMENT DURING THE DUE DILIGENCE PERIOD. HOWEVER, OLSSON DOES NOT HAVE ACCESS TO THE PHASE I ESA FOR FURTHER REVIEW.

1. RELATIVELY DEEP PILL AREAS WILL REQUIRE AN ALLOTMENT OF TIME FOLLOWING PLACEMENT TO ALLOW CONSOLIDATION AND ELASTIC SETTLEMENT OF UNDERLYING SOILS AND THE PILL SECTION TO OCCUR SUBSEQUENT TO WHICH THE PILL CAN BE SUBJECTED TO RICE SHALE DRILLING FOR DESIRED PERFORMANCE.
2. SHALE AND SANDSTONE BEDROCK EXCAVATION ANTICIPATED TO REQUIRE PILL ALLOWED TO BE REINFORCED ON-SITE WITH PULVERIZATION AND WATER CONTENT ADJUSTMENTS. EARTHWORK CONTRACTORS WITH SPECIALIFICATIONS AND EXPERIENCE IN HANDLING AND MANAGING THESE TYPES OF MATERIALS SHOULD BE SCREENED AND SELECTED.
3. CHEMICAL MODIFICATION OF SITE SOILS IS OFTEN NEEDED TO UTILIZE THE ON-SITE SOILS AS FILL MATERIAL WITHIN 4 AND 2 FEET BELOW BOTTOM OF FLOOR SLABS AND PAVEMENTS, RESPECTIVELY TO CONTROL SHRINK-SWELL CHARACTERISTICS.
4. A PILOT LAM PROGRAM SHOULD BE UNDERTAKEN TO EVALUATE SUITABLE CHEMICAL TREATMENT ADDITIVES.

THE NATIVE STRIVE TO VERY STRIP OVERBURDEN SOILS AND SHALE BEDROCK ARE ALSO CONSIDERED SUITABLE FOR MINING. IN ORDER TO ACHIEVE THE MOST ECONOMICALLY FEASIBLE DESIGN, IT IS RECOMMENDED THAT SHALE BEDROCK TO A DEFINED DEPTH AND THE ZONE REPLIED WITH STRUCTURAL FILL IN THE PLANNED DATA CENTER BUILDING AREAS.

GROUND WATER ENCOUNTERED AT 9' - 25' BELOW NATIVE GROUND SURFACE. THESE LEVELS WILL BE DEEPER WITH SITES IN WINTER AND SEASONAL WEATHER CONDITIONS. TO BEST DETERMINE GROUNDWATER LEVELS, MONITORING WELLS SHOULD BE CONSIDERED WHEN DEVELOPING THE DESIGN AND CONSTRUCTION PLANS FOR THIS PROJECT.

7. TOP SOILS STRIPPING DEPTHS SHOULD BE CONSIDERED, WHICH COULD VARY. TOPSOIL AND STOCKPILE LOCATIONS SHOULD BE ACCOUNTED FOR ON-SITE DURING THE DESIGN OF MASS GRADING.
8. ANTICIPATED THAT SOILS WILL BE SUBJECT TO A NET LOSS OR SHRINKAGE OF 0-10% AND ROCK BELOW THE TOP OF SOILS WILL BE SUBJECT TO 10% TO 20% SHRINKAGE.

CURRENT SLOPE GRADING OF SITE IS CONSIDERED FEASIBLE. ALTERATIONS IN PLANNED CUT SLOPES EXPOSING SHALE AND SANDSTONE BEDROCK MAY BE NECESSARY AND SHOULD BE EVALUATED DURING DESIGN PHASE GEOTECHNICAL STUDIES. IN MANY INSTANCES THE LONGER TERM WEATHER AND EROSION OF BEDROCK WILL BE THE RESULT IN LOSS OF SHEAR STRENGTH AND THE SHALE MAY REQUIRE PERMANENT SLOPES FLATTER THAN 3:1. ADDITIONAL RECOMMENDATIONS OF BENCHING, PROVIDING PROTECTIVE GRASSING AND EROSION CONTROL MATS, AND THE INSTALLATION OF EROSION CONTROL PROVIDING PROTECTIVE COVER AND DESIGNING LATERAL SETBACKS SHOULD ALL BE CONSIDERED.
